

Sample Rate Conversion

- What is it?
 - High-quality interpolation to alternate sample rate
- Algorithm: digital low pass and reconstruction
- Code:
 - `resample(snd, rate)` ; fixed rate
 - `sound-warp(warp-fn, signal, wrate)` ; variable map
- Notes:
 - `sound-warp` applies *warp-fn* to *signal*
 - Nyquist must compute inverse of *warp-fn* at *wrate*
